Printing Services

Our printing consultants work meticulously to create the most accurate colour representations of an artwork. Our team will make sure that every image is matched with the most suitable archival materials and mediums for reproductions guaranteeing optimal results.

Giclée Prints

Giclée printing is the process of making fine art prints from a digital source using an inkjet printer. The process is distinguished by the specific combination of inks and media that are selected. We can produce Giclée prints on to a wide range of media:

Somerset	Satin 305g/m ²
Artist Matt	White Canvas 380g/m ²
Hahnemuhle	Photorag 308g/m ²
Professional	Matt Canvas 430g/m ²

Professional Photographic Prints

Traditional photographic prints are created on fine art papers by using an inkjet process. Professional prints are priced inline with Giclée printing because of the quality of the materials that we utilise for this process:

FineArt Baryta	High Gloss 325g/m ²
FineArt Pearl	Pearl Finish 285g/m ²

Inkjet Media

These are more standard photographic papers, lighter in weight and thinner than Giclée and Photographic Media:

Premium Satin	Photo Paper 260g/m ²
Premium Gloss	Photo Paper 260g/m ²

Additional A4 proof print of artwork – for prints larger than 16x20

£8.00

Size	Giclée and Professional Photo papers (Ex VAT)	Inkjet Ex VAT)
A4	£30.00	£15.00
